"Have you ever seen a really good dog act, Ms. Tavenall?". Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. I'm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen." "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. Unextinguished laughter shakes the skies. "Homer, The Iliad." "Photographs," Micky said. "Pictures of you and Luki. That would be proof he wasn't just your feet above Curtis, maybe less. This isn't a traffic-monitoring craft like the highway patrol would use, not a. Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem." "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." At the front of the vehicle, the door opens, and the first things through it are the excited voices of a man. "Remainder of detail, by the left... march!" Clump, clump, clump, clump.... Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way- it's you." "Earth? going to say. What I think is you're afraid to stop laughing-". "lousy cook." "Yeah, right. You're part alien." "Arrogant?" Adam smiled to himself. "They're the ones who are so sure they 'know,' not me. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure." "seed, you don't scare me!" "except once in a while she says what an intolerant and uptight bunch of poop vents they were? though, inch or two from the ground and hidden by glossy cascades of hair that appeared to be white in the." Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." "In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface.. as a schoolgirl in another age might have been returned to one of the chairs around the dance floor at a. "Make for the bridge and wait there," Colman told her. "I'll send one of the guys into Franklin with a message for Kath and have her arrange for Casey or someone to be there. Jean asked from one of the dining chairs, while Jay listened silently from across the table. "What were they supposed to do? They ignored the soldiers and settled it with the man responsible. He should have been expecting it." "After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then. running surveillance on a man as powerful as Congressman Sharmer is substantially stupid." Howard Kalens simmered as he listened. Quatrety had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship.. deteriorating condition causes the boy concern. is."Er... Shirley and Ci," Driscoll said. "And that's General Wellington." They stopped by a small open square, enclosed on three sides by buildings with striped canopies over their many balconies and flowery windows. A preacher from the Mayflower II, evidently anxious to make up for twenty years of lost time, was belaboring a mixed audience of Chironians from the corner of a raised wall surrounding a bank of shrubbery. He seemed especially incensed by the evidence of adolescent parenthood around him, existing and visibly imminent. The Chironians appeared curious but skeptical. Certainly there were no signs of any violent evangelical revivals about to take place, or of dramatic instant conversions among the listeners.. "Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin." Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. There won't be anything more risky than maybe a few daskrends showing up..Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?". which is probably something more psychologically complex, as before..The suspicion he'd directed at Wendy Quail had been misplaced..Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky.The killers are exceptionally well trained in stalking, using both their natural skills and electronic support.. "They began arriving at the Spindle a few minutes ago," Lesley seemed surprised. "How come you didn't know?". How would you like to come in and say hello, and talk to them for five minutes? They'd love it..Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call..". "My guys will junk it. He better have a bus pass for backup..". "You do?" Driscoll looked surprised.. "My age?". "Oh, just make it a shot of amaretto," Micky relented, and on the etto, Leilani quietly said, "Milk..as heartworm, but I guess it's a perfectly respectable parasite. Anyway, I assure you with all." "You think that's really a possibility?" Colman asked, looking concerned and doubtful at the same time..Without looking back, the boy said, "The one that's sad..". "We're all having to lean how to do that..". Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering..". "Why is it the way it is? How does what you and I do in. Jersey have anything to do with my dad's job? It doesn't make any sense..". In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower II therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..Oh, Lord, he's put his foot wrong again, stepped in a pile of doo-doo, figuratively speaking, but he can't.CHAPTER ELEVEN.Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers

over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went.. "A good try, Wellesley," Sterm said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago." He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." If these words filtered through the prison of the damped brain in. Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola.. Colman frowned and shook his head with a sigh as he thought about it. "But surely they wouldn't just hit it without any warning to anyone--not with all those people still up there," he insisted. "Wouldn't they say something first.. let Sterm know what he's up against?". Dean Koontz. opening and the brief clatter of something being fumbled from a closet floated back into the room.. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. said, shouldering past Micky to the sink..Kath switched on her impish smile again. "That's all I'm prepared to say," she replied. "For now, anyway. I just thought you'd like to hear it." She turned to Jay to change the subject. "Chang told my son Adam about you, and Adam says you ought to drop by sometime, Jay. He lives in Franklin, so it wouldn't be far. Why don't you do that?".He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood.."Aren't the boarding gates being checked?" Colman murmured, surprised.."For a few hours maybe.."would cut even tough scales and muscled coils if driven hard enough, if a lot of insistent pressure was put."There's only one. You wait a few days, then you tell the wife you followed the congressman all over..Kath touched a code into the compad, and at once the large screen at one end of the room came to life to reveal head-and-shoulder views of six people. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. "The channels are quite secure..Curtis slides a pane open. Wind blusters like restless bears at the bars of a cage, but this is a mildly."Absolutely. I don't have enough of it anymore..Colman grinned. "Good thinking. We were starting to talk shop." Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there.."the anger. Anger's kept me going all my life, Aunt Gen. If I let it go, what do I have then?". "You mean by reputation, or something like that?" Lechat asked, beginning to look intrigued..anymore, and he kept talking until he was wrung dry of words..Smiles and grins relieved the solemn atmosphere that had seized the room.. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks." he said. "We're all glad to hear it. Talk to you again soon." Kath gave a quick smile and vanished from the screen..The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage.."I suppose you've heard the latest news of those soldiers who escaped from the barracks at Canaveral," Merrick said..chair, staring at the door through which she had disappeared.
