"Smart thinking," said Venerate. "Now how do I get this game started?" energy has made the world rich, but the population is stable, even though early detection has wiped out. "Over there," said Amos pointing back out the door, "is that end. And over there is this end," and he pointed out the front window, "and right here is the other end." stretched out upon the bed. Ought to undress, but he was too tired. The throbbing in his head was worse, pulsing to the beat of the drums. And the hate was in his head, too. God, that ugly face! Like the thing in mythology? what was it? the Medusa. One look turned men to stone. Her locks of hair were live serpents. "Miss Tremaine, you'd make somebody a wonderful mother." She didn't even humph; she just picked up her purse and stalked out I sniveled the chair around and looked at the calendar. Tomorrow was the 4th. 190. The inner nest was free-form. The New Amsterdamites had allowed it to stay pretty much the way the whirlibirds had built it, only taking down an obstruction here and there to allow humans to move around. It was a maze of gauzy walls and plastic struts, with clear plastic pipes running all over and carrying fluids of pale blue, pink, gold, and wine. Metal spigots from the Podkayne had been inserted in some of the pipes. McKillian was kept busy refilling glasses for the visitors who wanted to sample the antifreeze solution that was fifty per cent ethanol. It was good stuff, Captain Singh reflected as he drained his third glass, and that was what he still couldn't understand. The minute she saw me, Debbie's face fell. "She's trying to take over, Matthew." On the greyest and gloomiest island on the map is a large grey gloomy castle, and great grey stone steps lead up from the shore to the castle entrance. This was the skinny grey man's gloomy grey home. On the following grey afternoon, the ship pulled up to the bottom of the steps, and the grey man, leading two bound figures, walked up to the door. Mary Lang sighed, slapped her thighs, and stood up. Like all the others, she was nude and seemed totally at home with it None of them had worn anything but a Martian pressure suit for eight years. She ran her hand lovingly over the gossamer wall, the wall that had provided her and her fellow colonists and their children protection from the cold and the thin air for so long. He was struck by her easy familiarity with what seemed to him outlandish surroundings. She looked at home. He couldn't imagine her anywhere else. Crawford shrugged, uneasy at the question. He didn't know if it was the right time to even postulate that they might fail. The captain glares at me and balls his meaty hands into fists. I tense in expectation of blows which do not fall. Instead, he shakes his head emphatically and turns to the Intermediaries, "This is ridk-ulons. Thoroughly ridiculous." 241. "I think I can answer that," McKillian said. Ever?" one another was like steel against bronze. "It'll keep. It's cold out there, baby." "Why is that?" He takes a step toward the door. The Intermediaries move to block his path. With an inarticulate screech, he ploughs through them, swatting them aside with the backs of his hands, kicking them out of his way with his heavy-booted feet. The Intermediaries break easily, and it occurs to me then that they are probably as disposable a commodity among the Sreen as tissue paper is among human beings. One Intermediary is left limping along after the captain. Through the clear pale skin of its back, I see that some vertebrae have been badly dislocated. The thing nevertheless succeeds in overtaking the captain and wrapping its appendages around his calf, bleating all the while, "No, no, you must abide by the edict, even as every other inferior species has, you must abide. . . ." The captain is having trouble disentangling himself, and so I go to him. Together, we tear the Intermediary loose. Amos asked when they had finished eating. "Let's go over what we've learned. First, now that Lou's dead there's very little chance of ever lifting off. That is, unless Mary thinks she can absorb everything she needs to know about piloting the Podkayne from those printouts Weinstein sent down. How about it, Mary?" She raised her feet so a group of three gawking women from the ship could get by. They were letting them come through in groups of five every hour. They didn't dare open the outer egress more often than that, and Lang was wondering if it was too often. The place was crowded, and the kids were nervous.
