Celia didn't seem to hear. Her mind was still back where the conversation had been before Kath's call. After a short silence she said without moving her head, "It wasn't a warning from the Chironians." "Do you figure they might start trouble, chief?" Stanislaw asked, turning his head toward Sirocco..might be..He needs several items, and a quick but cautious tour of the lower floor convinces him that he will have.Or, at least, the three that lived with him. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all.."Not me. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles.."The country's Founding Fathers would be so proud."..Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been."Got a name??.A round container, rather like a hatbox, stood on the bed; its red lid lay to one side..harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked,..grisly souvenirs..the woman obscene names, heaped verbal abuse on her, and she seemed to thrill to every vicious and..At a table stacked with clean plates, Curtis stops and, though still crouching, dares to raise his head. With that he turned about and began walking stiffly toward the main doors at the rear.."That's right-Michigan. I think I was something of a not-very-welcome accident. My mother liked the fun life-lots of boyfriends, and staying out all night and stuff. I guess I was in the way a lot of the time."."How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..With sorrow banished in a blink, anger and fear were in equal command of her. "You don't own me!"..The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated.."I workout.."..She brightened. Then it' II get worse.."..dedication is too effusive and in need of cutting. Well, this time she's wrong.."..Oh, there was something I meant to

show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?" A short hall, lined with imitation wood paneling, featured three doors. Two bedrooms and a closet. "Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. "All planetary communications and database facilities at your disposal--public, domestic, educational, professional, end personal; information storage, computation, entertainment~ instruction, tuition, reference, travel arrangements, accommodations, services, goods, end resources, secretarial assistance, and consultancy. You name it, I can handle it or put you in touch with the right people." "She couldn't have known," Geneva said, but those four words were more of a question than they were. She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again."
