It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?". In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to. Grinning, Leilani bit into a crisp dill pickle. "I really like you, Micky B. You, too, Mrs. D." could be a cover for low self esteem. From childhood at least through adolescence, Micky herself had. So it's probably Michelle. Most women your age are named. Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because. ". precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend. "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running. In his peripheral vision, he repeatedly glimpses movements ghostly stalkers flanking him. Each time that. Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life. "Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?". "Your Chevy? It was a piece of crap.". Four elderly women, three elderly men, a thirty-year-old mother of two ... a six-year-old boy in a. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The

only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..in museums. Her willow-leaf eyes were as green as spring and as cool as the layered shade deep in a.As the tattooed serpent's grin grew wider on the beefy hand, the snake charmer laughed. "I like you.,He must always remember that every story of a boy and his dog is also a story of a dog and its boy. No."We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?".His-impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties.."Would you feel better if I said I haven't figured it out yet either?". "It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think".Wellesley, Borftein, and Lechat were standing helpless and petrified in the middle of the floor. "He'll do it," Celia whispered, horrified, to Bernard..The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. But she will never be at his side again in this life..Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..Jay and Colman stared at each other as they both came to the same, obvious conclusion at the same time. "That's it," Jay murmured..Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured..The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork-was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. The three Terrans crossed the street and stood for a while to watch more closely..Retreating toward the front door, with the dismayed dog at his side, he?s aware of people staring at him.
