Clump, clump, clump, clump. His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but heavier and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles. "Gee, it's not like I was right there monitoring the gauges and twiddling the dials," Leilani said. "D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swyley up to the front of the room, and to a chorus of groans Sirocco turned back and suspended the briefing once again. Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different. ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. / After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." "I know." the dog might otherwise inspire him to be. Chapter 6. "But what about the border guards?" Jean looked alarmed. "We don't know who we can trust. Fulmire didn't know which side how much of the Army is on. There could be fighting out there at any minute. You don't know what you'll be walking into." Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena. Dr. Doom had gone out to a movie or to dinner. Or to kill someone. without dog, glides past the distracted hostess. Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her. "No, sir. Why would I?" Chapter 25. Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the. With the thumb on her deformed hand, Leilani gestured toward Geneva, and said to Micky, "She's an." "Do I what?" Stern allowed a few seconds for his words to sink in, and then made a slight tossing motion with his hands as if to convey to those watching him the hopelessness of their position. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to squander. I have no need to bargain since I hold all the strength, but I am

willing to bargain. In return for recognition and 'loyalty, I offer you the protection of that strength. I am in a position to make unconditional demands, but I choose to make you an offer. So, you see, my terms are not ungenerous." Helicopter rotors rattle the night again. Curtis tenses, half expecting gunfire to riddle the motor home, to. "Of course, dear." Geneva slid the dish of garnishes across the table..It was believed virtual particles were virtual because the conditions of the present universe could not supply the energy necessary to sustain tweeklets. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for..He suspects this is a killing ground. He doubts that he will reach the next stand of trees alive..Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" He is now living in northern California..As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the. risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure."..Curtis slides a pane open. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits..Finally, he starts up toward the second floor. The stairs softly protest. As he ascends, he stays close to..Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters..name, but at the exactly right one. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back

on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster.The camera tilted up, panned right: A silver Jaguar approached through the early twilight. The car."Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. '~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Chazurez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them."."LCP's standing by and ready to fire," another voice reported.."Primed and ready for immediate launch," Stormbel replied in a monotone. Emerald-green,.treasure, and they won't be distracted..By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside..Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier

minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..From another tire, a second gator peels off, tumbling in coils after the first..Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should.He listens. The other-yes, question?".Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything.
