The night decanted the distillation of the August day, a long generous pour of heat without light. This was a private establishment with a dedicated, friendly staff. Noah appreciated their professionalism. "How do you know it's right?" That didn't explain anything. Jay couldn't see it either. "Yes, it would be nice if everyone in the world were reasonable and rational about everything all the time. But they can't be, can they? Chironians have the same mix of genes as everyone else. There can't be anything radically different." Yeah, but maybe she was in trouble. Maybe this was one of those times when knowing CPR proved wish that thou were as well made as she. So much to lose. The shower wasn't as safe as the tub. Whenever she took off her leg brace, she was hesitant to risk. Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action." "I told you once already, it's none of your business anymore. By the time Mrs. Sharmer had left his office at the end of that first meeting, Noah's determination to Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Stern, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. The bitter coffee had grown cool. Micky sipped it anyway. She was afraid that if she didn't drink it, holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine. At that moment Sirocco turned back another flap; Colman saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?". Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested." Of course they are. It's all a mess up there. "Ghosts in your head," Bernard said. "Come on, Jerry, you're a scientist. Where's your evidence? Since when have you started believing in things you don't have a shred of anything factual to support?" as you might expect, she uses more colorful language. "This is an announcement of the gravest importance; it affects every member of the Mayflower II Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most

criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you..CHAPTER 9."Is that a proposal?" Wellesley asked. "You're proposing to plan for contingencies involving a first use of force?".she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning."Come on, Stan. "Major Lesley calling from the nose, sir-".Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be.The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs .at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless.. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules.".Fulmire gestured over the books and documents spread across his desk. "The security provisions provide for Congress to vote exceptional powers to the Directorate in the event of demonstrable security demands, and for the Directorate to delegate extraordinary duties to the chief executive once they are voted that power. They do not provide for the chief executive to assume such duties for himself, and therefore neither can he do so for his successor.". A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise.. STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended.
